## 81 Year Old Nigerian Wants a New Wife!

Clinton Howard

It's been one year since RBC was launched in Nigeria, Africa by a native Christian minister, Rev. Dandaura, but already people there are reporting dramatic health improvement.

Rev. Dandaura says, "Nigeria with over 140 million people was the first market. It has responded extremely well, especially as the products have had to compete against long established conventional products. But the efficacy of RBC products has the greater advantage and future here as people keep trying the different products."

"RBC products in West Africa sell themselves by their efficacy.... People are finding out that these health products work."

"Men who had lost their youthful feel and energy suddenly got back their personalities, energies, and vitalities with the use of Microhydrin Plus. Their wives testify gratefully to this, because their romantic lives have been restored. The usual complaint of tiredness and weakness – gone."

One customer told his wife that he "felt like a walking dead man, but as soon as he began taking **Microhydrin Plus**, ... I feel like I am alive! I was dead but now I am alive!"

The Reverend is also receiving exciting reports on the use of other RBC products. He says, "Users of **IQ-DHA** have noticed great improvements in eye sight and memory performance. A lady bought many bottles at once for her son after she tried the first bottle on him and the son showed marked improvement in his studies, and got great grades in school after the consistent use of **IQ-DHA**."

"10 Days of Chocolate is changing the waist line of many of our product users. Some who had tried other weight loss programs with other companies that failed them, tried this product, with most bitter skepticism, but are now full of great praise and admiration because of its true effectiveness."

Rev. Dandura is excited by the results people are getting on RBC products. He says "One great example is the over 80 year old Grand

father of one of my elders, who was, due to age, having sleeping problems and beginning to show both physiological and psychological signs. He was placed on Microhydrin Plus, IQ, Co Q 10, and Melatonin Plus. Shortly after he began to use the products, he regained himself, his sleep, and stamina. He eats like a young man, sleeps like a baby, and remembers every conversation with both long and short memories. His wife died some years ago. He is now feeling so well and correct that he is asking to marry a new wife – how about that!"

"Our marketing approach includes person to person contacts. They just tell their

personal testimonies and then network within local communities for users. Some Associate distributors recruit sales people to go out to build downlines and to sell products. Large numbers of brochures on over 40 different products have been re-printed and tens of thousands are in mass distribution and circulation in the region. They are also using videos and CD's. Local opportunity meetings are presently being held by Associates."

The RBC Associates have even made forays into West Africa, Kenya, the Congo, and North Africa.

"We are planning by God's grace to increase the number of local opportunity meetings in all the 36 major cities of Nigeria and then move into all the Sub-Saharan African countries. We are making a drive to get at least 2% of our target population on **Microhydrin Plus** in the year to come. Our hopes are high and God helping us we shall improve the health and wellness of Africa with these great RBC NanoCeutical products."

I know that everyone in RBC Life Sciences wants to thank Reverend Maiwa' zi Dandaura Samu for his pioneering efforts that have resulted in the successful launch of RBC into the continent of Africa, expanding and continuing our mission to bring "Better Nutrition for Better Health" to people throughout the world.
