RBC LIFE SCIENCES: PIONEERING NANOTECHNOLOGY IN NUTRITIONAL SCIENCE

Volume 2, Number 13

June 2006

Thank You J.C. Penny

Grandparents usually carry pictures of their grandkids to show their friends and relatives. I have great help in showing pictures of Carolyn's two year old daughter, Faith – help from a very prominent institution.

Since she was first born, people who had seen Faith said she was so alert, pretty, and healthy looking that she should be a model. One of America's biggest department-store chains, J.C. Penny thought so too. They put her pictures in baby clothes in their national ads, and large posters of her in their stores all over the country. Recently they put a photograph of her when she was seven months old on the J. C. Penney gift card.

If any of your customers ask how early they can start giving children RBC products, this example should help you explain that **you start before they are born.**

You may remember hearing Carolyn describe the products she took for nine months when she was expecting. Each day she took: **2 tsp. Green Phyto-Power, 4 Microhydrin®, 2 IQ, 25 Spirulina tablets, 2 oz. TRUAloe, Slim Shake,** and the **vitamin/minerals** we had at that time (**similar to 24Seven Life Essentials**).

She also took **2 Digestion Formula** with each meal.

After Faith was born, Carolyn continued to take all of the above, plus **3 more IQ** each day while nursing.

When Faith was just a few weeks old Carolyn began giving Faith **Spirulina Powder, First Food, and IQ.**

When the baby could eat solid food she started her on **Spirulina** powder and tablets. Today Faith loves eating **Spirulina** tablets as a snack. The little green mouth wipes clean easily and the healthy diet helps to make for a happy smiling child.

Now we have additional great products such as **24Seven Life Essentials** that you can add to the list of nutritional supplements recommended for expecting mothers as well as for other adults and children of all ages.

In Carolyn's personal testimonial, she said:

"I was so grateful for RBC during my pregnancy! Even when I was too queasy to eat right, I knew that I was nourishing my baby with superfoods like **Spirulina, Green Phyto-Power** and **TRUAloe**. I relied on **Microhydrin** to give me energy, especially during the last trimester.

As soon as I went into labor, I drank a **Spirulina** smoothie and took 4 **Microhydrin**. I didn't realize that I was in for a 32-hour delivery due to her position, but I am glad I took the products because they really helped me and the baby pull through with no medical intervention necessary. Her heartbeat stayed strong the entire time and she received an APGAR score of 10, which meant she was in perfect health.

When she was 3 weeks old, I continued on the products and even started giving Faith **Spirulina** and **Digestion Formula**. I also used **Aloe Gelee** to soothe her baby acne and cradle cap which cleared up in 2 days. Everywhere we go people say they have never seen such an alert and happy baby. I feel so blessed to have the RBC products for her health and mine."

So the next time you are in a J.C. Penney store ask for a free gift card and you can use it to show people that it's never too early to start using RBC products for Mom and her healthy children.
